

Shine on Me

www.shine-on-me.ch

1. Print

When you print this page, please control the scale of the document by measuring this 5 cm line:

It should be 5cm (+/- 0.5 mm) long. Then all the other dimensions on your printout will be accurate. Is the line is longer or shorter than 5 cm? Please check your printer settings (A4 format, no page scaling, zoom 100%).

2. Cut-out

To determine your ring size you can use one of two methods:

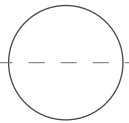

1. Fold the printed sheet exactly at the dotted line. The semi-circles can be cut just fine. Stick your finger through the holes and determine the size.
2. An easier method may be to place one of your rings over the circles and match the inside diameter of the ring to the appropriate circle. Then note the ring size. The inner diameter of the ring is important

for the size. Additionally think about which finger on which hand you will wear the ring. The fingers of the right and left hand are sometimes have different ring sizes.

3. Aussuchen

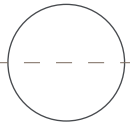

Once you determine the correct ring size, contact our sales department and provide them with the correct model number, corresponding type of 18kt gold (white, rose or yellow), and ring size. You should receive the ring in less than 4 weeks from the time the order is placed.
